"The Texas Vintage represents all that's best about the real thing and makes a mockery of arguments about old-versus-new or country of origin."

Front Tone: In the lower position this functions as a normal master tone control. If you tap this special potentiometer with your finger it will pop out. In this position it adds the neck pickup to the bridge or bridge/middle for maximum tonal variety.

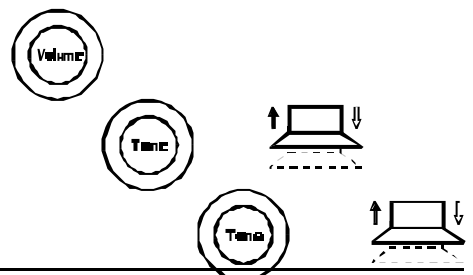

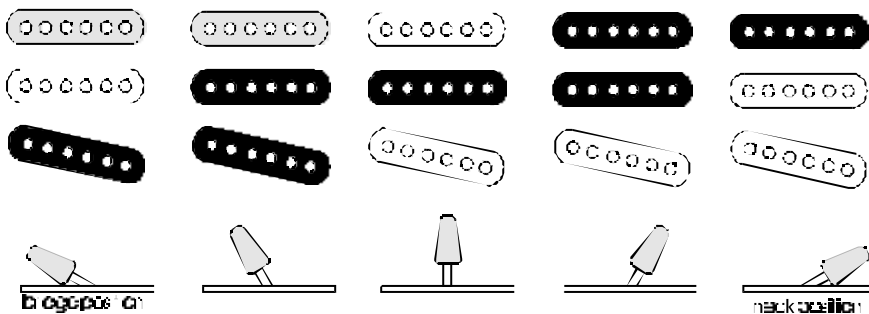

Rear Tone: In the lower position this potentiometer has no function. If you tap this special pot with your finger it will pop out and switch on the Magnum Boost. As you turn it up it adds gain and fatness to your sound for real PUNCH.
